I am in support of Strong Net Neutrality backed by Title 2 oversight of ISP's! This bill is a blatant sellout by our republican representatives who are trying to pass this off as a good thing for the American people. I don't know if they're ignorant, stupid, apathetic or all three, but this bill will do nothing to help the American consumer. The only thing this bill will do is give large corporations far more freedom to screw everybody over. They'll have the market completely cornered and instead of trying to improve their services to compete with smaller providers they'll just charge more for the same mediocre service they already provide. Thank you for your consideration.
